Legacy

Malaco International is a top ranking MBE (minority business enterprise). We are Hispanic as well as Women owned and have been family owned and operated since 1977. Malaco is WBENC certified, PUC certified and recently been awarded Top 100 minority owned businesses in the Bay Area as well as Top 100 Women Owned businesses in the Bay Area.

Malaco distributes commodity chemicals, unbranded motor fuels, and glycerin including oleo chemicals domestically and internationally.

We serve the continental United States by accessing local regional inventory from our manufacturers. Our primary focus is in the USA, while we also participate in global import-export transaction.

Our domestic business plan focuses our attention to companies such as aerospace, electric power facilities, oil companies, soap and detergent compounding, chemical specialties, agriculture, state, federal and city government agencies, water districts and many others.

Integrity

Malaco's founder, the late Manuel Llama, based his business practice on his integrity. Keeping business on a personal level, "ask them what they want and give them what they ask for at a fair price on time". At Malaco we stand behind our products, and will always go the distance to take care of our customer.

Knowledge

At Malaco we pride ourselves in complete product knowledge and application. Our specially trained staff can assist you in all your compounding, raw materials, and application needs. Our knowledge and experienced sales team focuses on building long lasting relationships with both our customer and suppliers. Our close relationships with our suppliers allow us the ability to obtain products in times of shortage. We also provide customers with cost effective solutions to their chemical needs
